Art Unit: 1625

Claims 1-33, are pending in this application.

Claims 20-24, 29-33, are non-elected.

Response to Restriction

The election of group I, claims 1-28 in part, filed 2/24/10 is hereby acknowledged. There is no indication if the election is made with or without traverse. Therefore, it is deemed made without traverse. Applicant also elects the compound at page 80, lines 15-16 for examination purpose. Claims 1-28 in part, are being examined in this Office action in accordance with applicant's election. The restriction is deemed proper and therefore made FINAL.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-19, 25-28, are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The term "pseudohalo" is not a normal chemical nomenclature, not found in any chemical dictionary and not defined in the specification. Therefore, the claims lack adequate support in the specification. By deleting the term in every occurrence the rejection would be overcome.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Art Unit: 1625

Claims 1-19, 25-28, are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim [23-30] does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, e.g. claim 1, recites the broad recitation of "optionally substituted alkyl . . . or optionally substituted cycloalkyl" and the claim also recites "all of which may be optionally substituted with one to ten substituents," which are the narrower statement of the range/limitation. Appropriate correction is required in every occurrence.

Claims 1-7, 9, 11, 13-14, 16-18, 25-28, are not in proper format. Under US patent practice a claim must set forth what is being claimed not what is not claimed. In the instant case, e.g. claim 1, recites several lines of definitions for R25 as what are not claimed rendering the claim confusing and not clear. Therefore, the claims are indefinite. Appropriate correction is required. In patent examination, it is essential for claims to be precise, clear, correct, and unambiguous. *In re Zletz*, 893 F.2d 319, 13 USPQ2d 1320 (Fed. Cir. 1989).
